

MOH. RAMADAN

Quality Assurance Analyst

Malang, East Java Indonesia | +62 81945599109 | moh.ramadan8h@gmail.com | IG : @moh.ramadan_

SUMMARY

QA Analyst with 4+ years of experience in software testing for web and mobile applications. Experienced in manual, exploratory, regression, smoke, UAT, API, and cross-browser testing, using tools such as Jira, Postman, Figma, Trello, and Google Sheets. Skilled in requirement analysis, risk-based testing, test case design, defect reporting, and communicating software issues clearly. Possess a strong understanding of the software development lifecycle, supported by knowledge of DevOps practices such as version control, CI/CD, Docker, Jenkins, DevSecOps, and performance testing.

EXPERIENCE

KUKU FM (MUMBAI, INDIA)

QA Specialist - Contract (Feb 2026 - Present)

- Conduct functional, exploratory, smoke, sanity, regression, UAT, and usability/UI testing on Android applications.
- Test payment and refund workflows, including successful transactions, failures, and edge-case scenarios.
- Validate user flows and features to ensure functional, visual, and user experience requirements are met.
- Document test results, defects, and findings using Google Sheets, and collaborate with developers through Slack to verify fixes.

NNTRAVEL LLC (ARAB SAUDI)

QA Specialist - Part Time (Oct 2025 - Present)

- Conduct functional, exploratory, smoke, UAT, and usability/UI testing across Android, iOS, and web/admin applications.
- Validate end-to-end booking flows, including reservations, status updates, cancellations, and edge-case scenarios.
- Test payment and wallet processes, including successful transactions, failures, and refund scenarios.
- Document test results and defects using Google Sheets and collaborate with developers via Microsoft Teams to verify fixes.

KUKU FM (MUMBAI, INDIA)

QA Specialist - Part Time (May 2025 - Aug 2025)

- Conduct functional, exploratory, smoke, sanity, regression, UAT, and usability/UI testing on Android applications.
- Test payment and refund workflows, including successful transactions, failures, and edge-case scenarios.
- Validate user flows and features to ensure functional, visual, and user experience requirements are met.
- Document test results, defects, and findings using Google Sheets, and collaborate with developers through Slack to verify fixes.

PT. ALPHA TECH INDONESIA (SIDOARJO, INDONESIA)

Generalist (July 2024 - June 2025)

- Conducted product and system research to assess application feasibility, feature coverage, and suitable technologies for development.
- Prepared and presented product workflows, features, and technical approaches to clients while gathering and clarifying requirements.
- Supported teams with frontend/UI design and product-related tasks based on project requirements.

Operations Team Member (June 2023 - June 2025)

- Managed client communication, website data/content updates, and project coordination while supporting internal operations.
- Created client-facing materials using Figma and Canva and supported meeting preparation and documentation.

Quality Assurance Analyst (May 2022 - June 2025)

- Conduct functional, exploratory, regression, smoke, sanity, UAT, and UI/UX testing across web and mobile applications.
- Validate features and requirements for client projects to ensure alignment with business and functional expectations.
- Perform API testing and backend validation using Postman across relevant application workflows.
- Design and execute test cases while documenting defects, test results, and findings using Jira, Trello, Notion, Google Sheets, and Google Docs.
- Collaborate with developers and stakeholders to clarify issues, verify bug fixes, and support stable software releases.
